Annex on service charges for organizing customs inspections

In case customs authorities select a shipment for a physical inspection, SGS Maco can organize this inspection for you. We differentiate between the following situations:

- **Inspection of an export shipment:**
  - Inspection will usually take place on your own premises or at the site of your logistics service provider. In this case we do not charge any fee for organizing the inspection.
  - Should you want to have the inspection take place at the site of one of our partners, then we charge €95.00 per inspection.

- **Inspection of a sea freight import (container) shipment:**
  - In case you want us to organise the inspection, we will have it take place at the site of one of our partners. We then charge €95.00 per inspection, with a maximum of one hour work. We will then coordinate with customs, gas measurement company, inspection location, terminal, importer and logistics service provider and we’ll issue a document with which the goods can be transported from the terminal to the site where the inspection will take place. Third party costs (like the gas measurement or the charges of the inspection location) will be forwarded to you one-on-one.
  - In case you decide to organize the inspection by yourself, there are no charges from us.
  - In case the goods are located in a warehouse outside the terminal area we will not charge any fee for organizing the inspection.

- **Inspection of other import shipments:**
  - Inspection will usually take place on your own premises or at the site of your logistics service provider. In this case we do not charge any fee for organizing the inspection.
  - Should you want to have the inspection take place at the site of one of our partners, then we charge €95.00 per inspection.

- **Inspection of transit departure or arrival:**
  - Inspection will take place on your own premises or at the site of your logistics service provider. In this case we do not charge any fee for organizing the inspection.
